

Use this Site Survey form to help you identify required signage for your office, factory or worksite. Display signs to educate employees and visitors about company procedures and safety policies, and to warn of hazards. Seton products are manufactured under the QA Standard ISO 9001 and where possible the relevant Australian Standard. Although Seton makes every attempt to ensure signs comply with the requirements of the AS 1319:1994, Seton strongly recommends that you consult your industry's relevant regulating body or specific Australian Standard to ensure that your business is compliant with all areas of safety.

To use this form, simply tick the corresponding box for the sign(s) you require and specify the quantity needed. A space has been provided so you can make note of an alternative part number where the suggested size or material is not suitable. As a general rule, Seton recommends metal signs for outdoor use and, polypropylene signs for indoor use. All part numbers are sold as each unless otherwise specified. Please note that pricing and page numbers correspond with Seton's latest catalogue for easy reference.

To place your order, fax the completed survey to our customer service team on free fax 1800 678 796 or for further assistance please call 1800 651 173.

GENERAL OFFICE INCLUDING COMMON AREAS
